MONTANA'S WAGE INFORMATION

Several sources of data have been drawn together to arrive at a Prevailing Wage Survey for the state of Montana. Since actual "prevailing" wages could not be computed from available data (a count of employees was not available), the high and low wages for an area were used. These wages are basically starting hourly wages for a particular occupation, and do not include fringe benefits or travel allowances. Wages designated by an "N" in the last column of the tables originated from one of two sources: either the Area Wage Survey conducted by the Bureau of Labor Statistics, U.S. Department of Labor, or from the Employment Security Automated Reporting System (ESARS) Starting Occupational Wage Survey based on job openings placed at the Montana Job Services offices. The third source of information used for wage data came from actual union contracts in effect throughout the state of Montana. These wages are designated by a "U" in the last column.

Wages in this survey are broken down according to occupational classifications based on a uniform set of job descriptions from the U.S. Department of Labor's Dictionary of Occupational Titles (D.O.T.). The basic occupational categories (the first digit of the six digit D.O.T. code) are:

0. Professional, technical, and managerial occupations
1. Professional, technical, and managerial occupations
2. Clerical and sales occupations
3. Service occupations
4. Farming, fishery, forestry, and related occupations
5. Processing occupations

6. Machine trades occupations
7. Bench work occupations
8. Structural work occupations
9. Miscellaneous occupations

Hourly wages for the state of Montana are shown in the first table, followed by wages for occupations within each county. If an occupation is known to exist within a county but is not listed at the county level, the wage for the state of Montana should be used for that particular occupation within the county.
